A-001 Vendor Support and Spares Readiness Report

A-001 | Cooling Water Pump | Enterprise Asset Reliability Training Scenario

Document ID	A001-VSR-2026-09	Version	1.0
Status	APPROVED	Effective / Issue Date	2026-09-10
Owner	Vendor Management Office	Asset	A-001
Location	Utilities Area - Bay 3	Data Class	Synthetic / Training

TRAINING NOTICE: This fictional document is designed only for AI/RAG, analytics and governance training. It is not an engineering instruction and must not be used on real equipment.

1. Purpose

This fictional vendor-readiness report summarizes support availability, indicative lead times and commercial dependencies relevant to the A-001 reliability review. It does not constitute a purchase order, vendor commitment or technical recommendation.

2. Support Availability

Support Item	Availability	Indicative Lead Time	Confidence
Remote technical consultation	Available	2-3 business days	High
On-site specialist support	Conditional	7-10 business days	Medium
Standard bearing kit	Indicative stock	10-14 business days	Medium
Coupling inspection kit	Available	5-7 business days	Medium
Non-standard spare package	To be confirmed	3-5 weeks	Low

3. Vendor Information Constraints

- Lead times are planning indicators and may change after formal quotation.
- Availability does not establish technical necessity.
- Any spare selection must follow qualified engineering review and approved procurement controls.

4. Commercial Dependencies

Dependency	Status	Owner
Final technical scope	Open	Reliability / Maintenance
Formal quotation	Not requested	Procurement
Budget approval	Not approved	Finance
Site-support date	Provisional	Vendor Management

5. Project Risk Implications

The most material vendor risk is timing uncertainty if non-standard support or spares are required. Because the technical scope is not yet final, the project should avoid converting indicative vendor availability into a committed schedule.

6. Evidence Traceability

Statement	Related Source
Technical scope remains open	A001-MPR-2026-09
Financial estimates are planning values	A001-FIN-2026-Q3
Inspection evidence requires qualified review	A001-DIR-2026-09

7. Next Vendor Review

- Confirm whether a formal vendor quotation is required after scope review.
- Refresh indicative lead times before any schedule commitment.
- Record quote version, date and commercial validity if procurement proceeds.
